

TUMMY TOUR

The Tummy Tour includes the following activities:

- 1) **Tummy Tour:** Students embark on an immersive tour of the human digestive system by transforming into food particles and exploring the role each organ plays to aid digestion.
- 2) **Get Active:** Students explore the concept of healthy eating and the different food groups through an active relay.

The Tummy Tour can be adapted depending on the age range and prior knowledge of your students to ensure the most is attained from the experience.
